Sir:

Submitted herewith is a listing of documents known to Applicants and/or their attorney in compliance with the requirements of 37 C.F.R. § 1.56. In order to facilitate review by the Examiner, US patents or published US patent applications were substituted for counterpart foreign applications whenever possible. Copies of the listed documents, with the exception of United States patent references, are also enclosed.

In addition to the documents cited herein, Applicants wish to make the Examiner aware of the following co-pending applications:

10/510,946 filed June 3, 2003;
10/539,132 filed October 18, 2003;
10/546,061 filed March 26, 2004;
10/501,925 filed July 28, 2004;
10/584,464 filed December 1, 2004;
10/528,178 filed March 17, 2005;

10/544,041 filed August 2, 2005;
10/553,967 filed October 19, 2005;
10/571,441 filed June 16, 2005;
11/572,018 filed July 5, 2005;
11/575,409 filed September 30, 2005;
11/720,613 filed November 29, 2005;
11/722,122 filed December 20, 2005;
11/368,602 filed March 7, 2006;
11/748,874 filed May 15, 2007;
11/813,103 filed September 11, 2005;
11/822,862 filed July, 10 2007.

In accordance with 37 C.F.R. §1.98(a)(3), Applicants' undersigned attorney submits the following concise explanation of the relevance of the non-English language documents cited on the accompanying form:

Reference B1, DE 44 07 547 A1, describes a method of marking bodies of transparent material, especially glass, by laser radiation. An English language abstract corresponding to this document is cited on the accompanying list of references as document C1.

Reference B2, DE 10 2004 008 202 describes thermoplastic molding materials useful in preparing things such as fibers, foils and molded articles. The materials comprise: thermoplastic polymers, spherically; organically modified nano-filler materials; and other additives. An English language abstract corresponding to this document is cited on the accompanying list of references as document C2.

Reference B5, WO 2006/072496, describes the use of a molded mass (comprising a copolyamide) for the production of a printable or printed article. An English language abstract corresponding to this document is cited on the accompanying list of references as document C3.

Reference B6, WO 2006/087248, describes a moulding compound comprising a partially crystalline copolyamide and a crystallization auxiliary of metal salts, metal oxides or metal

hydroxides that reacts with carboxyl terminal groups of the copolyamide. The moulding compound may be used for preparing a printed article. An English language abstract corresponding to this document is cited on the accompanying list of references as document C4.

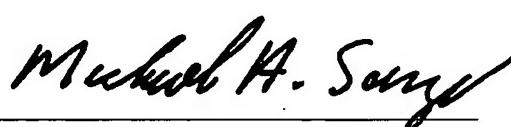

Reference B8, WO 2006/111302, describes a process for making thermoplastic molding materials. The method involves mixing the molding material in a molten state with inorganic particles and solubilizing agents in an extruder. The mixture is then passed into an expansion zone where it is cooled and molded. An English language abstract corresponding to this document is cited on the accompanying list of references as document C5.

Applicants do not waive any rights to appropriate action to establish patentability over any of the listed documents should they be applied as references against the claims of the present application. This statement should not be construed as a representation that more material information does not exist or that an exhaustive search of the relevant art has been made.

Consideration of the cited documents and making the same of record in the prosecution of the above-captioned application are respectfully requested. Applicants do not believe any fee is due for the submission of this Information Disclosure Statement. However, the Commissioner is hereby authorized to charge any fee deficiency to our Deposit Account No. 50-4056 under Order No. 7601/88288.

Respectfully submitted,
